FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
1.0	Scope	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
2.0	Normative references	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
3.0	Terms and definitions	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Standardized Terminology	SEA-02.1	Mechanisms exist to standardize technology and process terminology to reduce confusion amongst groups and departments.	5	
4.0	Context of the organization	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Statutory, Regulatory & Contractual Compliance	CPL-01	Mechanisms exist to facilitate the identification and implementation of relevant statutory, regulatory and contractual controls.	5	Section 4.1 includes "climate action changes" that a reasonable person would conclude has nothing to do with cybersecurity and is merely an inclusion for Environmental, Social & Governance (ESG) compliance to push a political agenda. If climate change is a material concern for the organization, then Artificial Intelligence (AI) initiatives should be avoided entirely, due to the high electricity consumption requirements.
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a: (1) Strategic security, compliance and resilience-specific business plan; and (2) Set of objectives to achieve that plan.	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Requirements Definition	PRM-05	Mechanisms exist to proactively govern Technology Assets, Applications and/or Services (TAAS) by: (1) Defining technical security, compliance and resilience requirements; and (2) Performing a criticality analysis at predefined decision points in the Secure	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Process Definition	PRM-06	Mechanisms exist to define business processes with consideration for security, compliance and resilience that determines: (1) The resulting risk to organizational operations, assets, individuals and other organizations; and (2) Information protection needs arising from the defined business processes and revises the processes as necessary, until an achievable set of protection needs is obtained.	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Context Definition	AAT-03	Mechanisms exist to establish and document the context surrounding Artificial Intelligence (AI) and Autonomous Technologies (AAT), including: (1) Intended purposes; (2) Potentially beneficial uses; (3) Context-specific laws and regulations; (4) Norms and expectations; and (5) Prospective settings in which the system(s) will be deployed.	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Value Sustainment	AAT-01.3	Mechanisms exist to sustain the value of deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Mission and Goals Definition	AAT-03.1	Mechanisms exist to define and document the organization's mission and defined goals for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements Definition	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.1	Understanding the organization and its context	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Environmental Impact & Sustainability	AAT-17.2	Mechanisms exist to assess and document the environmental impacts and sustainability of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements Definition	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Mission and Goals Definition	AAT-03.1	Mechanisms exist to define and document the organization's mission and defined goals for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Process Definition	PRM-06	Mechanisms exist to define business processes with consideration for security, compliance and resilience that determines: (1) The resulting risk to organizational operations, assets, individuals and other organizations; and (2) Information protection needs arising from the defined business processes and revises the processes as necessary, until an achievable set of protection needs is obtained.	5	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Strategic Plan & Objectives	PRM-01.1	Mechanisms exist to establish a: (1) Strategic security, compliance and resilience-specific business plan; and (2) Set of objectives to achieve that plan.	5	
4.2	Understanding the needs and expectations of interested parties	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Requirements Definition	PRM-05	Mechanisms exist to proactively govern Technology Assets, Applications and/or Services (TAAS) by: (1) Defining technical security, compliance and resilience requirements; and (2) Performing a criticality analysis at predefined decision points in the Secure	5	
4.3	Determining the scope of the AI management system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Attack Surface Scope	VPM-01.1	Mechanisms exist to define and manage the scope for its attack surface management activities.	5	
4.3	Determining the scope of the AI management system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Asset Scope Classification	AST-04.1	Mechanisms exist to determine security, compliance and resilience control applicability by identifying, assigning and documenting the appropriate asset scope categorization for all Technology Assets, Applications and/or Services (TAAS) and personnel (internal and third-parties).	5	
4.3	Determining the scope of the AI management system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Scope Review	TPM-05.5	Mechanisms exist to perform recurring validation of the Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to ensure security, compliance and resilience control assignments accurately reflect current: (1) Contractual obligations for the External Service Provider (ESP); (2) Mechanisms exist to specify and document the targeted application scope of the proposed use and operation of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
4.3	Determining the scope of the AI management system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Compliance Scope	CPL-01.2	Mechanisms exist to document and validate the scope of security, compliance and resilience controls that are determined to meet statutory, regulatory and/or contractual compliance obligations.	5	
4.4	AI management system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
5.0	Leadership	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Allocation of Resources	PRM-03	Mechanisms exist to identify and allocate resources for management, operational, technical and data protection requirements within business process planning for projects / initiatives.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Status Reporting To Governing Body	GOV-01.2	Mechanisms exist to provide governance oversight reporting and recommendations to those entrusted to make executive decisions about matters considered material to the organization's Security, Compliance & Resilience Program (SCRPR).	5	

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Define Control Objectives	GOV-09	Mechanisms exist to establish control objectives as the basis for the selection, implementation and management of the organization's internal security, compliance and resilience control system.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Viability Decisions	AAT-15	Mechanisms exist to define the criteria as to whether Artificial Intelligence (AI) and Autonomous Technologies (AAT) achieved intended purposes and stated objectives to determine whether its development or deployment should proceed.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Stakeholder Competencies	AAT-13.1	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related operator and practitioner proficiency requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT) are defined, assessed and documented.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor Security, Compliance & Resilience Program (SCRPP) measures of performance.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Management Resourcing	RSK-01.2	Mechanisms exist to reduce the magnitude or likelihood of potential impacts by resourcing the capability required to manage technology-related risks.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Resource Management	PRM-02	Mechanisms exist to address all capital planning and investment requests, including the resources needed to implement the Security, Compliance & Resilience Program (SCRPP) and document all exceptions to this requirement.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Authoritative Chain of Command	GOV-04.2	Mechanisms exist to establish an authoritative chain of command with clear lines of communication to remove ambiguity from individuals and teams related to managing Technology Assets, Applications, Services and/or Data (TAASD)-related risks.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Internal Controls	AAT-02.2	Mechanisms exist to identify and document internal security, compliance and resilience for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Operationalizing Security, Compliance & Resilience Capabilities	GOV-15	Mechanisms exist to compel data and/or process owners to operationalize security, compliance and resilience practices for Technology Assets, Applications, Services and/or Data (TAASD) under their control.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Accountability Structure	GOV-04.1	Mechanisms exist to enforce an accountability structure so that appropriate teams and individuals are empowered, responsible and trained for mapping, measuring and managing Technology Assets, Applications, Services and/or Data (TAASD)-related risks.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business As Usual (BAU) Security, Compliance & Resilience Practices	GOV-14	Mechanisms exist to incorporate security, compliance and resilience principles into Business As Usual (BAU) practices through executive leadership involvement.	5	
5.1	Leadership and commitment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
5.2	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.2(a)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.2(b)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.2(c)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.2(d)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
5.2(d)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Updating AI & Autonomous Technologies	AAT-10.14	Mechanisms exist to integrate continual improvements for deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
5.2(d)	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Continuous Improvements	AAT-07.3	Mechanisms exist to continuously improve Artificial Intelligence (AI) and Autonomous Technologies (AAT) capabilities to maximize benefits and minimize negative impacts associated with AAT.	5	
5.3	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Responsibilities for AI & Autonomous Technologies	AAT-08	Mechanisms exist to define and differentiate roles and responsibilities for: (1) Artificial Intelligence (AI) and Autonomous Technologies (AAT) configurations; and (2) Oversight of AAT systems.	5	
5.3	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
5.3	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Security, Compliance & Resilience Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide Security, Compliance & Resilience Program (SCRPP).	5	
5.3	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsibility To Supersede, Deactivate and/or Disengage AI & Autonomous Technologies	AAT-15.2	Mechanisms exist to define the criteria and responsible parties for superseding, disengaging or deactivating Artificial Intelligence (AI) and Autonomous Technologies (AAT) that demonstrate performance or outcomes inconsistent with intended use.	5	
5.3	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsible, Accountable, Supportive, Consulted & Informed (RASC) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASC) matrix, or similar documentation, to delineate assignment for security, compliance and resilience controls between internal stakeholders and External Service Providers (ESPs).	5	
5.3(a)	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Security, Compliance & Resilience Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide Security, Compliance & Resilience Program (SCRPP).	5	
5.3(a)	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Responsibilities for AI & Autonomous Technologies	AAT-08	Mechanisms exist to define and differentiate roles and responsibilities for: (1) Artificial Intelligence (AI) and Autonomous Technologies (AAT) configurations; and (2) Oversight of AAT systems.	5	
5.3(b)	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Security, Compliance & Resilience Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally-manage, coordinate, develop, implement and maintain an enterprise-wide Security, Compliance & Resilience Program (SCRPP).	5	
5.3(b)	Roles, responsibilities and authorities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Responsibilities for AI & Autonomous Technologies	AAT-08	Mechanisms exist to define and differentiate roles and responsibilities for: (1) Artificial Intelligence (AI) and Autonomous Technologies (AAT) configurations; and (2) Oversight of AAT systems.	5	
6.0	Planning	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
6.1	Actions to address risks and opportunities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
6.1.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Updating AI & Autonomous Technologies	AAT-10.14	Mechanisms exist to integrate continual improvements for deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
6.1.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Mapping	AAT-02.1	Mechanisms exist to identify Artificial Intelligence (AI) and Autonomous Technologies (AAT) in use and map those components to potential legal risks, including statutory and regulatory compliance requirements.	5	
6.1.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Profiling	AAT-09	Mechanisms exist to document the risks and potential impacts of Artificial Intelligence (AI) and Autonomous Technologies (AAT) that are: (1) Designed; (2) Developed; (3) Deployed; (4) Evaluated; and/or (5) Used.	5	
6.1.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Profiling	AAT-09	Mechanisms exist to document the risks and potential impacts of Artificial Intelligence (AI) and Autonomous Technologies (AAT) that are: (1) Designed; (2) Developed; (3) Deployed; (4) Evaluated; and/or (5) Used.	5	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
6.1.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Register	RSK-04.1	Mechanisms exist to maintain a risk register that facilitates monitoring and reporting of risks.	5	
6.1.2(a)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.2(a)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2(a)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
6.1.2(a)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
6.1.2(b)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.2(b)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2(b)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
6.1.2(b)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Unmeasurable AI & Autonomous Technologies Risks	AAT-16.3	Mechanisms exist to identify and document unmeasurable risks or trustworthiness characteristics.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Previously Unknown AI & Autonomous Technologies Threats & Risks	AAT-17.3	Mechanisms exist to respond to and recover from a previously unknown Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risk when it is identified.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Identification	RSK-03	Mechanisms exist to identify and document risks, both internal and external.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Material Risks	GOV-16.1	Mechanisms exist to define criteria necessary to designate a risk as a material risk.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
6.1.2(c)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Negative Residual Risks	AAT-15.1	Mechanisms exist to identify and document negative, residual risks (defined as the sum of all unmitigated risks) to both downstream acquirers and end users of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Framing	RSK-01.1	Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	5	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.2(d)	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Material Risks	GOV-16.1	Mechanisms exist to define criteria necessary to designate a risk as a material risk.	5

6.1.3(c)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	
6.1.3(c)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Compensating Countermeasures	RSK-06.2	Mechanisms exist to identify and implement compensating countermeasures to reduce risk and exposure to threats.	5	
6.1.3(d)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Compensating Countermeasures	RSK-06.2	Mechanisms exist to identify and implement compensating countermeasures to reduce risk and exposure to threats.	5	
6.1.3(d)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.3(d)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.3(d)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	
6.1.3(d)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
6.1.3(e)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
6.1.3(e)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.3(e)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.3(e)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	
6.1.3(f)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
6.1.3(f)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.3(f)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	
6.1.3(f)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.3(g)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
6.1.3(g)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
6.1.3(g)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
6.1.3(g)	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Framing	RSK-01.1	Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	5	
6.1.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
6.1.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Profiling	AAT-09	Mechanisms exist to document the risks and potential impacts of Artificial Intelligence (AI) and Autonomous Technologies (AAT) that are: (1) Designed; (2) Developed; (3) Deployed; (4) Evaluated; and/or (5) Used.	5	
6.1.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Impact Analysis (BIA)	RSK-08	Mechanisms exist to conduct a Business Impact Analysis (BIA) to identify and assess security, compliance and resilience risks.	5	
6.1.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Protection Impact Assessment (DPIA)	RSK-10	Mechanisms exist to conduct a Data Protection Impact Assessment (DPIA) on Technology Assets, Applications and/or Services (TAAS) that store, process and/or transmit Personal Data (PD) to identify and remediate reasonably-expected risks.	5	
6.2	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Defining Business Context & Mission	GOV-08	Mechanisms exist to define the context of its business model and document the organization's mission.	5	
6.2	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Define Control Objectives	GOV-09	Mechanisms exist to establish control objectives as the basis for the selection, implementation and management of the organization's internal security, compliance and resilience control system.	5	
6.2	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Purpose Validation	GOV-11	Mechanisms exist to monitor mission/business-critical Technology Assets, Applications and/or Services (TAAS) to ensure those resources are being used consistent with their intended purpose.	5	
6.2(a)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(b)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(c)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(d)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(e)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(f)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.2(g)	AI objectives and planning to achieve them	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
6.3	Planning of changes	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Configuration Change Control	CHG-02	Mechanisms exist to govern the technical configuration change control processes.	5	
6.3	Planning of changes	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Change Management Program	CHG-01	Mechanisms exist to facilitate the implementation of a change management program.	10	
6.3	Planning of changes	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Prohibition Of Changes	CHG-02.1	Mechanisms exist to prohibit unauthorized changes, unless organization-approved change requests are received.	5	
7.0	Support	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
7.1	Resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Updating AI & Autonomous Technologies	AAT-10.14	Mechanisms exist to integrate continual improvements for deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
7.1	Resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Security, Compliance & Resilience Protection Portfolio Management	PRM-01	Mechanisms exist to facilitate the implementation of resource planning controls that provide a portfolio management approach to achieve security, compliance and resilience objectives.	10	
7.1	Resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Allocation of Resources	PRM-03	Mechanisms exist to identify and allocate resources for management, operational, technical and data protection requirements within business process planning for projects / initiatives.	5	
7.1	Resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Trustworthy AI & Autonomous Technologies	AAT-01.2	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT) are designed to be reliable, safe, fair, secure, resilient, transparent, explainable and data privacy-enhanced to minimize emergent properties or unintended consequences.	5	
7.1	Resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Resource Management	PRM-02	Mechanisms exist to address all capital planning and investment requests, including the resources needed to implement the Security, Compliance & Resilience Program (SCRIP) and document all exceptions to this requirement.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Training	AAT-05	Mechanisms exist to ensure personnel and external stakeholders are provided with position-specific risk management training for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Human Resources Security Management	HRS-01	Mechanisms exist to facilitate the implementation of personnel security controls.	10	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Personnel Screening	HRS-04	Mechanisms exist to manage personnel security risk by screening individuals prior to authorizing access.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Competency Requirements for Security-Related Positions	HRS-03.2	Mechanisms exist to ensure that all security-related positions are staffed by qualified individuals who have the necessary skill set.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Stakeholder Competencies	AAT-13.1	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related operator and practitioner proficiency requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT) are defined, assessed and documented.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Roles With Special Protection Measures	HRS-04.1	Mechanisms exist to ensure that individuals accessing a system that stores, transmits or processes information requiring special protection satisfy organization-defined personnel screening criteria.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Position Categorization	HRS-02	Mechanisms exist to manage personnel security risk by assigning a risk designation to all positions and establishing screening criteria for individuals filling those positions.	5	
7.2	Competence	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
7.3	Awareness	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Formal Indoctination	HRS-04.2	Mechanisms exist to formally educate authorized users on proper data handling practices for all the relevant types of data to which they have access.	5	
7.3	Awareness	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Technology Use Restrictions	HRS-05.3	Mechanisms exist to establish usage restrictions and implementation guidance for organizational technologies based on the potential to cause damage to Technology Assets, Applications and/or Services (TAAS), if used maliciously.	5	
7.3	Awareness	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Use of Mobile Devices	HRS-05.5	Mechanisms exist to manage business risks associated with permitting mobile device access to organizational resources.	5

7.5.3(b)	Control of documented information	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Data Protection	DCH-01	Mechanisms exist to facilitate the implementation of data protection controls.	10	
8.0	Operation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Internal Controls	AAT-02.2	Mechanisms exist to identify and document internal security, compliance and resilience for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements Definition	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Define Control Objectives	GOV-09	Mechanisms exist to establish control objectives as the basis for the selection, implementation and management of the organization's internal security, compliance and resilience control system.	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Monitor Controls	GOV-15.5	Mechanisms exist to compel data and/or process owners to monitor Technology Assets, Applications, Services and/or Data (TAASD) under their control on an ongoing basis for applicable threats and risks, as well as to ensure security, compliance and resilience controls are operating as intended.	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assess Controls	GOV-15.3	Mechanisms exist to compel data and/or process owners to assess if required security, compliance and resilience controls for Technology Assets, Applications, Services and/or Data (TAASD) under their control are: (1) Implemented correctly; and	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Select Controls	GOV-15.1	Mechanisms exist to compel data and/or process owners to select required security, compliance and resilience controls for Technology Assets, Applications, Services and/or Data (TAASD) under their control.	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Operationalizing Security, Compliance & Resilience Capabilities	GOV-15	Mechanisms exist to compel data and/or process owners to operationalize security, compliance and resilience practices for Technology Assets, Applications, Services and/or Data (TAASD) under their control.	5	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
8.1	Operational planning and control	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Implement Controls	GOV-15.2	Mechanisms exist to compel data and/or process owners to implement required security, compliance and resilience controls for Technology Assets, Applications, Services and/or Data (TAASD) under their control.	5	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Likelihood & Impact Risk Analysis	AAT-07.2	Mechanisms exist to define the potential likelihood and impact of each identified risk based on expected use and past uses of Artificial Intelligence (AI) and Autonomous Technologies (AAT) in similar contexts.	5	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Situational Awareness of AI & Autonomous Technologies	AAT-02	Mechanisms exist to develop and maintain an inventory of Artificial Intelligence (AI) and Autonomous Technologies (AAT) (internal and third-party).	5	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Mapping	AAT-02.1	Mechanisms exist to identify Artificial Intelligence (AI) and Autonomous Technologies (AAT) in use and map those components to potential legal risks, including statutory and regulatory compliance requirements.	5	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Management Decisions	AAT-07	Mechanisms exist to leverage decision makers from a diversity of demographics, disciplines, experience, expertise and backgrounds for mapping, measuring and managing Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks.	5	
8.2	AI risk assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
8.3	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Compensating Countermeasures	RSK-06.2	Mechanisms exist to identify and implement compensating countermeasures to reduce risk and exposure to threats.	5	
8.3	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Response	RSK-06.1	Mechanisms exist to ensure proper risk response actions were performed to remediate findings from security, compliance and/or resilience-related: (1) Assessments;	5	
8.3	AI risk treatment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
8.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Impact Analysis (BIA)	RSK-08	Mechanisms exist to conduct a Business Impact Analysis (BIA) to identify and assess security, compliance and resilience risks.	5	
8.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Protection Impact Assessment (DPIA)	RSK-10	Mechanisms exist to conduct a Data Protection Impact Assessment (DPIA) on Technology Assets, Applications and/or Services (TAAS) that store, process and/or transmit Personal Data (PD) to identify and remediate reasonably-expected risks.	5	

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
8.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Framing	RSK-01.1	Mechanisms exist to identify: (1) Assumptions affecting risk assessments, risk response and risk monitoring; (2) Constraints affecting risk assessments, risk response and risk monitoring; (3) The organizational risk tolerance; and (4) Priorities, benefits and trade-offs considered by the organization for managing risk.	5	
8.4	AI system impact assessment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Impact Assessment	AAT-07.1	Mechanisms exist to assess the impact(s) of proposed Artificial Intelligence (AI) and Autonomous Technologies (AAT) on individuals, groups, communities, organizations and society (e.g., Fundamental Rights Impact Assessment (FRIA)).	5	
9.0	Performance evaluation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
9.1	Monitoring, measurement, analysis and evaluation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV)	AAT-10	Mechanisms exist to implement Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV) practices to enable Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related security, resilience and compliance-related conformity testing throughout the lifecycle of the AAT.	5	
9.2	Internal audit	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
9.2.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
9.2.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved purposes.	5	
9.2.1(a)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved purposes.	5	
9.2.1(a)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
9.2.1(a)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.1(a)(1)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved purposes.	5	
9.2.1(a)(1)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.1(a)(1)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
9.2.1(a)(2)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved purposes.	5	
9.2.1(a)(2)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
9.2.1(a)(2)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.1(b)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved purposes.	5	
9.2.1(b)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.1(b)	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
9.2.2	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.2(a)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.2(a)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Targeted Application Scope	AAT-04.3	Mechanisms exist to specify and document the targeted application scope of the proposed use and operation of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
9.2.2(b)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.2(b)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Independent Assessors	CPL-03.1	Mechanisms exist to utilize independent assessors to evaluate security, compliance and resilience at planned intervals or when the Technology Asset, Application and/or Service (TAAS) undergoes significant changes.	5	
9.2.2(c)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Internal Audit Function	CPL-02.1	Mechanisms exist to implement an internal audit function that is capable of providing senior organization management with insights into the appropriateness of the organization's technology and information governance processes.	5	
9.2.2(c)	Internal audit programme	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3	Management review	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
9.3.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(a)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5

9.3.2(c)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(c)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(c)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Stakeholder Feedback Integration	AAT-11.1	Mechanisms exist to regularly collect, consider, prioritize and integrate risk-related feedback from those external to the team that developed or deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
9.3.2(c)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Identification & Involvement	AST-01.2	Mechanisms exist to identify and involve pertinent stakeholders of critical Technology Assets, Applications, Services and/or Data (TAASD) to support the ongoing secure management of those assets.	5	
9.3.2(d)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor Security, Compliance & Resilience Program (SCR&P) measures of performance.	5	
9.3.2(d)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(d)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(d)(1)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(d)(1)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(d)(1)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor Security, Compliance & Resilience Program (SCR&P) measures of performance.	5	
9.3.2(d)(2)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(d)(2)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(d)(2)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor Security, Compliance & Resilience Program (SCR&P) measures of performance.	5	
9.3.2(d)(3)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(d)(3)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Measures of Performance	GOV-05	Mechanisms exist to develop, report and monitor Security, Compliance & Resilience Program (SCR&P) measures of performance.	5	
9.3.2(d)(3)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(e)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
9.3.2(e)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Steering Committee & Program Oversight	GOV-01.1	Mechanisms exist to align security, compliance and resilience capabilities with business requirements through a steering committee or advisory board, comprised of key cybersecurity, data protection and business executives, which meets formally and on a regular basis.	5	
9.3.2(e)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Updating AI & Autonomous Technologies	AAT-10.14	Mechanisms exist to integrate continual improvements for deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
9.3.2(e)	Management review inputs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Continuous Improvements	AAT-07.3	Mechanisms exist to continuously improve Artificial Intelligence (AI) and Autonomous Technologies (AAT) capabilities to maximize benefits and minimize negative impacts associated with AAT.	5	
9.3.3	Management review results	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Status Reporting To Governing Body	GOV-01.2	Mechanisms exist to provide governance oversight reporting and recommendations to those entrusted to make executive decisions about matters considered material to the organization's Security, Compliance & Resilience Program (SCR&P).	5	
10.0	Improvement	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
10.1	Continual improvement	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Continuous Improvements	AAT-07.3	Mechanisms exist to continuously improve Artificial Intelligence (AI) and Autonomous Technologies (AAT) capabilities to maximize benefits and minimize negative impacts associated with AAT.	5	
10.2	Nonconformity and corrective action	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Threat Analysis & Flaw Remediation During Development	IAO-04	Mechanisms exist to require system developers and integrators to create and execute a Security Testing and Evaluation (ST&E) plan, or similar process, to identify and remediate flaws during development.	5	
10.2	Nonconformity and corrective action	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Response	AAT-18.1	Mechanisms exist to prioritize, respond to and remediate Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks based on assessments and other analytical output.	5	
10.2	Nonconformity and corrective action	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Remediation	RSK-06	Mechanisms exist to remediate risks to an acceptable level.	5	
10.2	Nonconformity and corrective action	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Developer Threat Analysis & Flaw Remediation	TDA-15	Mechanisms exist to require system developers and integrators to develop and implement an ongoing Security Testing and Evaluation (ST&E) plan, or similar process, to objectively identify and remediate vulnerabilities prior to release to production.	5

10.2(e)	Nonconformity and corrective action	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Capabilities Deficiency Tracking	IAO-05	Mechanisms exist to govern identified deficiencies (e.g., Plan of Action and Milestones (POA&M) or similar methodology) that formally documents, at a minimum: (1) Deficiency tracking number;	5	
A.1	General	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
A.2	Policies related to AI	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
A.2.2	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
A.2.2	AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
A.2.3	Alignment with other organizational policies	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Publishing Security, Compliance & Resilience Documentation	GOV-02	Mechanisms exist to establish, maintain and disseminate policies, standards and procedures necessary for secure, compliant and resilient capabilities.	5	
A.2.4	Review of the AI policy	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Periodic Review & Update of Security, Compliance & Resilience Program	GOV-03	Mechanisms exist to review the Security, Compliance & Resilience Program (SCR), including policies, standards and procedures, at planned intervals or if significant changes occur to ensure their continuing suitability, adequacy and effectiveness.	5	
A.3	Internal organization	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Accountability Structure	GOV-04.1	Mechanisms exist to enforce an accountability structure so that appropriate teams and individuals are empowered, responsible and trained for mapping, measuring and managing Technology Assets, Applications, Services and/or Data (TAASD)-related risks.	5	
A.3	Internal organization	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Authoritative Chain of Command	GOV-04.2	Mechanisms exist to establish an authoritative chain of command with clear lines of communication to remove ambiguity from individuals and teams related to managing Technology Assets, Applications, Services and/or Data (TAASD)-related risks.	5	
A.3.2	AI roles and responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Responsibilities for AI & Autonomous Technologies	AAT-08	Mechanisms exist to define and differentiate roles and responsibilities for: (1) Artificial Intelligence (AI) and Autonomous Technologies (AAT) configurations; and (2) Oversight of AAT systems.	5	
A.3.2	AI roles and responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Defined Roles & Responsibilities	HRS-03	Mechanisms exist to define cybersecurity roles & responsibilities for all personnel.	5	
A.3.2	AI roles and responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assigned Security, Compliance & Resilience Responsibilities	GOV-04	Mechanisms exist to assign one or more qualified individuals with the mission and resources to centrally manage, coordinate, develop, implement and maintain an enterprise-wide Security, Compliance & Resilience Program (SCR).	5	
A.3.2	AI roles and responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Roles With Special Protection Measures	HRS-04.1	Mechanisms exist to ensure that individuals accessing a system that stores, transmits or processes information requiring special protection satisfy organization-defined personnel screening criteria.	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Development Life Cycle (SDLC) Management	PRM-07	Mechanisms exist to ensure changes to Technology Assets, Applications and/or Services (TAAS) within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Incident Handling	IRO-02	Mechanisms exist to cover: (1) Preparation; (2) Automated event detection or manual incident report intake;	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Stakeholder Feedback Integration	AAT-11.1	Mechanisms exist to regularly collect, consider, prioritize and integrate risk-related feedback from those external to the team that developed or deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Continuous Improvements	AAT-07.3	Mechanisms exist to continuously improve Artificial Intelligence (AI) and Autonomous Technologies (AAT) capabilities to maximize benefits and minimize negative impacts associated with AAT.	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Robust Stakeholder Engagement for AI & Autonomous Technologies	AAT-11	Mechanisms exist to compel ongoing engagement with relevant Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholders to encourage feedback about positive, negative and unanticipated impacts.	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Ongoing Assessments	AAT-11.2	Mechanisms exist to conduct regular assessments of Artificial Intelligence (AI) and Autonomous Technologies (AAT) with independent assessors and stakeholders not involved in the development of the AAT.	5	
A.3.3	Reporting of concerns	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies End User Feedback	AAT-11.3	Mechanisms exist to collect and integrate feedback from end users and impacted communities into Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related system evaluation metrics.	5	
A.4	Resources for AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Trustworthy AI & Autonomous Technologies	AAT-01.2	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT) are designed to be reliable, safe, fair, secure, resilient, transparent, explainable and data privacy-enhanced to minimize emergent properties or unintended	5	
A.4	Resources for AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
A.4.2	Resource documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Requirements Definition	PRM-05	Mechanisms exist to proactively govern Technology Assets, Applications and/or Services (TAAS) by: (1) Defining technical security, compliance and resilience requirements; and (2) Performing a criticality analysis at predefined decision points in the Secure	5	
A.4.2	Resource documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Development Life Cycle (SDLC) Management	PRM-07	Mechanisms exist to ensure changes to Technology Assets, Applications and/or Services (TAAS) within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
A.4.2	Resource documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience In Project Management	PRM-04	Mechanisms exist to assess security, compliance and resilience controls as part of Technology Assets, Applications and/or Services (TAAS) project development to determine whether controls are implemented correctly, operating as intended and	5	
A.4.2	Resource documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Security, Compliance & Resilience Protection Portfolio Management	PRM-01	Mechanisms exist to facilitate the implementation of resource planning controls that provide a portfolio management approach to achieve security, compliance and resilience objectives.	10	
A.4.2	Resource documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Allocation of Resources	PRM-03	Mechanisms exist to identify and allocate resources for management, operational, technical and data protection requirements within business process planning for projects / initiatives.	5	
A.4.3	Data resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.4.4	Tooling resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Targeted Application Scope	AAT-04.3	Mechanisms exist to specify and document the targeted application scope of the proposed use and operation of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.4.4	Tooling resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Situational Awareness of AI & Autonomous Technologies	AAT-02	Mechanisms exist to develop and maintain an inventory of Artificial Intelligence (AI) and Autonomous Technologies (AAT) (internal and third-party).	5	
A.4.5	System and computing resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Situational Awareness of AI & Autonomous Technologies	AAT-02	Mechanisms exist to develop and maintain an inventory of Artificial Intelligence (AI) and Autonomous Technologies (AAT) (internal and third-party).	5	
A.4.5	System and computing resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Targeted Application Scope	AAT-04.3	Mechanisms exist to specify and document the targeted application scope of the proposed use and operation of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.4.6	Human resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Technologies Stakeholder Competencies	AAT-13.1	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related operator and practitioner proficiency requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT) are defined, assessed and	5	
A.4.6	Human resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Stakeholder Diversity	AAT-13	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT) stakeholder competencies, skills and capacities incorporate demographic diversity, broad domain and user experience expertise.	5	
A.4.6	Human resources	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Identification & Involvement	AST-01.2	Mechanisms exist to identify and involve pertinent stakeholders of critical Technology Assets, Applications, Services and/or Data (TAASD) to support the ongoing secure management of those assets.	5

A.5	Assessing impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Risk Management Program	RSK-01	Mechanisms exist to facilitate the implementation of strategic, operational and tactical risk management controls that are aligned with: (1) The organization's Enterprise Risk Management (ERM); and	10	
A.5	Assessing impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Autonomous Technologies-Related Legal Requirements	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.2	AI system impact assessment process	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security Impact Analysis for Changes	CHG-03	Mechanisms exist to analyze proposed changes for potential security impacts, prior to the implementation of the change.	5	
A.5.2	AI system impact assessment process	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Notification of Changes	CHG-05	Mechanisms exist to ensure stakeholders are made aware of and understand the impact of proposed changes.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Mapping	AAT-02.1	Mechanisms exist to identify Artificial Intelligence (AI) and Autonomous Technologies (AAT) in use and map those components to potential legal risks, including statutory and regulatory compliance requirements.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Autonomous Technologies-Related Legal Requirements	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security Impact Analysis for Changes	CHG-03	Mechanisms exist to analyze proposed changes for potential security impacts, prior to the implementation of the change.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Potential Costs Analysis	AAT-04.2	Mechanisms exist to assess potential costs, including non-monetary costs, resulting from expected or realized Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related errors or system functionality and trustworthiness.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Impact Analysis (BIA)	RSK-08	Mechanisms exist to conduct a Business Impact Analysis (BIA) to identify and assess security, compliance and resilience risks.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Stakeholder Notification of Changes	CHG-05	Mechanisms exist to ensure stakeholders are made aware of and understand the impact of proposed changes.	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Impact Assessment	AAT-07.1	Mechanisms exist to assess the impact(s) of proposed Artificial Intelligence (AI) and Autonomous Technologies (AAT) on individuals, groups, communities, organizations and society (e.g., Fundamental Rights Impact Assessment (FRIA)).	5	
A.5.3	Documentation of AI system impact assessments	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Protection Impact Assessment (DPIA)	RSK-10	Mechanisms exist to conduct a Data Protection Impact Assessment (DPIA) on Technology Assets, Applications and/or Services (TAAS) that store, process and/or transmit Personal Data (PD) to identify and remediate reasonably-expected risks.	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Protection Impact Assessment (DPIA)	RSK-10	Mechanisms exist to conduct a Data Protection Impact Assessment (DPIA) on Technology Assets, Applications and/or Services (TAAS) that store, process and/or transmit Personal Data (PD) to identify and remediate reasonably-expected risks.	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements Definition	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Mapping	AAT-02.1	Mechanisms exist to identify Artificial Intelligence (AI) and Autonomous Technologies (AAT) in use and map those components to potential legal risks, including statutory and regulatory compliance requirements.	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Impact Analysis (BIA)	RSK-08	Mechanisms exist to conduct a Business Impact Analysis (BIA) to identify and assess security, compliance and resilience risks.	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Impact Assessment	AAT-07.1	Mechanisms exist to assess the impact(s) of proposed Artificial Intelligence (AI) and Autonomous Technologies (AAT) on individuals, groups, communities, organizations and society (e.g., Fundamental Rights Impact Assessment (FRIA)).	5	
A.5.4	Assessing AI system impact on individuals or groups of individuals	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Potential Costs Analysis	AAT-04.2	Mechanisms exist to assess potential costs, including non-monetary costs, resulting from expected or realized Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related errors or system functionality and trustworthiness.	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Risk Mapping	AAT-02.1	Mechanisms exist to identify Artificial Intelligence (AI) and Autonomous Technologies (AAT) in use and map those components to potential legal risks, including statutory and regulatory compliance requirements.	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Business Impact Analysis (BIA)	RSK-08	Mechanisms exist to conduct a Business Impact Analysis (BIA) to identify and assess security, compliance and resilience risks.	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Potential Costs Analysis	AAT-04.2	Mechanisms exist to assess potential costs, including non-monetary costs, resulting from expected or realized Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related errors or system functionality and trustworthiness.	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Impact Assessment	AAT-07.1	Mechanisms exist to assess the impact(s) of proposed Artificial Intelligence (AI) and Autonomous Technologies (AAT) on individuals, groups, communities, organizations and society (e.g., Fundamental Rights Impact Assessment (FRIA)).	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Protection Impact Assessment (DPIA)	RSK-10	Mechanisms exist to conduct a Data Protection Impact Assessment (DPIA) on Technology Assets, Applications and/or Services (TAAS) that store, process and/or transmit Personal Data (PD) to identify and remediate reasonably-expected risks.	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.5.5	Assessing societal impacts of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Risk Assessment	RSK-04	Mechanisms exist to conduct recurring assessments of risk that includes the likelihood and magnitude of harm, from unauthorized access, use, disclosure, disruption, modification or destruction of the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.6	AI system life cycle	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	No Relationship	N/A	N/A	N/A	0	
A.6.1	Management guidance for AI system development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Technology Development & Acquisition	TDA-01	Mechanisms exist to facilitate the implementation of tailored development and acquisition strategies, contract tools and procurement methods to meet unique business needs.	10	
A.6.1	Management guidance for AI system development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Security, Compliance & Resilience Protection Portfolio Management	PRM-01	Mechanisms exist to facilitate the implementation of resource planning controls that provide a portfolio management approach to achieve security, compliance and resilience objectives.	10	
A.6.1.2	Objectives for responsible development of AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Trustworthy AI & Autonomous Technologies	AAT-01.2	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT) are designed to be reliable, safe, fair, secure, resilient, transparent, explainable and data privacy-enhanced to minimize emergent properties or unintended	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Autonomous Technologies Implementation Tasks	AAT-14.1	Mechanisms exist to define the tasks that Artificial Intelligence (AI) and Autonomous Technologies (AAT) will support (e.g., classifiers, generative models, recommenders).	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Development Methods, Techniques & Processes	TDA-02.3	Mechanisms exist to require software developers to ensure that their software development processes employ industry-recognized secure practices for secure programming, engineering methods, quality control processes and validation techniques to minimize flawed and/or malformed software.	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Intellectual Property Infringement Protections	AAT-12	Mechanisms exist to prevent third-party Intellectual Property (IP) rights infringement by Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Knowledge Limits	AAT-14.2	Mechanisms exist to identify and document knowledge limits of Artificial Intelligence (AI) and Autonomous Technologies (AAT) to provide sufficient information to assist relevant stakeholder decision making.	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Software Development Practices (SSDP)	TDA-06	Mechanisms exist to develop applications based on Secure Software Development Practices (SSDP).	5	
A.6.1.3	Processes for responsible AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Technology Development & Acquisition	TDA-01	Mechanisms exist to facilitate the implementation of tailored development and acquisition strategies, contract tools and procurement methods to meet unique business needs.	10

A.6.2	AI system life cycle	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Product Management	TDA-01.1	Mechanisms exist to design and implement product management processes to proactively govern the design, development and production of Technology Assets, Applications and/or Services (TAAS) across the System Development Life Cycle (SDLC) to:	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Artificial Intelligence (AI) & Autonomous Technologies Governance	AAT-01	Mechanisms exist to ensure policies, processes, procedures and practices related to the mapping, measuring and managing of Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related risks are in place, transparent and implemented effectively.	10	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Requirements Definition	PRM-05	Mechanisms exist to proactively govern Technology Assets, Applications and/or Services (TAAS) by: (1) Defining technical security, compliance and resilience requirements; and (2) Performing a criticality analysis at predefined decision points in the Secure Development Life Cycle (SDLC).	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Development Life Cycle (SDLC) Management	PRM-07	Mechanisms exist to ensure changes to Technology Assets, Applications and/or Services (TAAS) within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience In Project Management	PRM-04	Mechanisms exist to assess security, compliance and resilience controls as part of Technology Assets, Applications and/or Services (TAAS) project development to determine whether controls are implemented correctly, operating as intended and producing the desired outcome with respect to meeting requirements.	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Minimum Viable Product (MVP) Security Requirements	TDA-02	Mechanisms exist to design, develop and produce Technology Assets, Applications and/or Services (TAAS) in such a way that risk-based technical and functional specifications ensure Minimum Viable Product (MVP) criteria establish an	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Internal Controls	AAT-02.2	Mechanisms exist to identify and document internal security, compliance and resilience for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Product Management	TDA-01.1	Mechanisms exist to design and implement product management processes to proactively govern the design, development and production of Technology Assets, Applications and/or Services (TAAS) across the System Development Life Cycle (SDLC) to: (1) Improve functionality.	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.2	AI system requirements and specification	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security, Compliance & Resilience Resource Management	PRM-02	Mechanisms exist to address all capital planning and investment requests, including the resources needed to implement the Security, Compliance & Resilience Program (SCRP) and document all exceptions to this requirement.	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Knowledge Limits	AAT-14.2	Mechanisms exist to identify and document knowledge limits of Artificial Intelligence (AI) and Autonomous Technologies (AAT) to provide sufficient information to assist relevant stakeholder decision making.	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Technology Development & Acquisition	TDA-01	Mechanisms exist to facilitate the implementation of tailored development and acquisition strategies, contract tools and procurement methods to meet unique business needs.	10	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Autonomous Technologies Intellectual Property Infringement	AAT-12	Mechanisms exist to prevent third-party Intellectual Property (IP) rights infringement by Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV)	AAT-10	Mechanisms exist to implement Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV) practices to enable Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related security, resilience and compliance-related conformity	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Requirements Definitions	AAT-14	Mechanisms exist to take socio-technical implications into account to address risks associated with Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Mission and Goals Definition	AAT-03.1	Mechanisms exist to define and document the organization's mission and defined goals for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Development Methods, Techniques & Processes	TDA-02.3	Mechanisms exist to require software developers to ensure that their software development processes employ industry-recognized secure practices for secure programming, engineering methods, quality control processes and validation techniques to minimize flawed and/or malformed software.	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Autonomous Technologies Implementation Tasks	AAT-14.1	Mechanisms exist to define the tasks that Artificial Intelligence (AI) and Autonomous Technologies (AAT) will support (e.g., classifiers, generative models, recommenders).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.3	Documentation of AI system design and development	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Software Development Practices (SSDP)	TDA-06	Mechanisms exist to develop applications based on Secure Software Development Practices (SSDP).	5	
A.6.2.4	AI system verification and validation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Model Validation	AAT-10.9	Mechanisms exist to validate the Artificial Intelligence (AI) and Autonomous Technologies (AAT) model.	5	
A.6.2.4	AI system verification and validation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Trustworthiness Assessment	AAT-10.1	Mechanisms exist to evaluate Artificial Intelligence (AI) and Autonomous Technologies (AAT) for trustworthy behavior and operation including security, anonymization and disaggregation of captured and stored data for approved	5	
A.6.2.4	AI system verification and validation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV)	AAT-10	Mechanisms exist to implement Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV) practices to enable Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related security, resilience and compliance-related conformity	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Information Assurance (IA) Operations	IAO-01	Mechanisms exist to facilitate the implementation of security, compliance and resilience assessment and authorization controls.	10

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Specialized Assessments	IAO-02.2	Mechanisms exist to conduct specialized assessments for: (1) Statutory, regulatory and contractual compliance obligations; (2) Monitoring capabilities; (3) Mobile devices;	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Implementation Tasks	AAT-14.1	Mechanisms exist to define the tasks that Artificial Intelligence (AI) and Autonomous Technologies (AAT) will support (e.g., classifiers, generative models, recommenders).	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Security Authorization	IAO-07	Mechanisms exist to ensure Technology Assets, Applications and/or Services (TAAS) are officially authorized prior to "go live" in a production environment.	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Technical Verification	IAO-06	Mechanisms exist to perform Information Assurance Program (IAP) activities to evaluate the design, implementation and effectiveness of technical security, compliance and resilience controls.	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Assessments	IAO-02	Mechanisms exist to formally assess the security, compliance and resilience controls in Technology Assets, Applications and/or Services (TAAS) through Information Assurance Program (IAP) activities to determine the extent to which the	5	
A.6.2.5	AI system deployment	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV)	AAT-10	Mechanisms exist to implement Artificial Intelligence Test, Evaluation, Validation & Verification (AI TEVV) practices to enable Artificial Intelligence (AI) and Autonomous Technologies (AAT)-related security, resilience and compliance-related conformity	5	
A.6.2.6	AI system operation and monitoring	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Post-Deployment Monitoring	AAT-10.1.3	Mechanisms exist to proactively and continuously monitor deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.6	AI system operation and monitoring	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Production Monitoring	AAT-16	Mechanisms exist to monitor the functionality and behavior of the deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Development Life Cycle (SDLC) Management	PRM-07	Mechanisms exist to ensure changes to Technology Assets, Applications and/or Services (TAAS) within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Documentation Requirements	TDA-04	Mechanisms exist to obtain, protect and distribute administrator documentation for Technology Assets, Applications and/or Services (TAAS) that describe: (1) Secure configuration, installation and operation of the TAAS;	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Standardized Operating Procedures (SOP)	OPS-01.1	Mechanisms exist to identify and document Standardized Operating Procedures (SOP), or similar documentation, to enable the proper execution of day-to-day / assigned tasks.	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Practices Guidelines	OPS-05	Mechanisms exist to provide guidelines and recommendations for the secure use of Technology Assets, Applications and/or Services (TAAS) to assist in the configuration, installation and use of the product and/or service.	5	
A.6.2.7	AI system technical documentation	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Product Management	TDA-01.1	Mechanisms exist to design and implement product management processes to proactively govern the design, development and production of Technology Assets, Applications and/or Services (TAAS) across the System Development Life Cycle	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Development Life Cycle (SDLC) Management	PRM-07	Mechanisms exist to ensure changes to Technology Assets, Applications and/or Services (TAAS) within the Secure Development Life Cycle (SDLC) are controlled through formal change control procedures.	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting business functions, workforce, and/or customers based on industry-recognized standards to achieve the specific goals of the process area.	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Secure Practices Guidelines	OPS-05	Mechanisms exist to provide guidelines and recommendations for the secure use of Technology Assets, Applications and/or Services (TAAS) to assist in the configuration, installation and use of the product and/or service.	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Standardized Operating Procedures (SOP)	OPS-01.1	Mechanisms exist to identify and document Standardized Operating Procedures (SOP), or similar documentation, to enable the proper execution of day-to-day / assigned tasks.	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Product Management	TDA-01.1	Mechanisms exist to design and implement product management processes to proactively govern the design, development and production of Technology Assets, Applications and/or Services (TAAS) across the System Development Life Cycle	5	
A.6.2.8	AI system recording of event logs	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Documentation Requirements	TDA-04	Mechanisms exist to obtain, protect and distribute administrator documentation for Technology Assets, Applications and/or Services (TAAS) that describe: (1) Secure configuration, installation and operation of the TAAS;	5	
A.7	Data for AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.7	Data for AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Quality Operations	DCH-22	Mechanisms exist to check for Redundant, Obsolete/Outdated, Toxic or Trivial (ROTT) data to ensure the accuracy, relevance, timeliness, impact, completeness and de-identification of information throughout the information lifecycle.	5	
A.7	Data for AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Trustworthy AI & Autonomous Technologies	AAT-01.2	Mechanisms exist to ensure Artificial Intelligence (AI) and Autonomous Technologies (AAT) are designed to be reliable, safe, fair, secure, resilient, transparent, explainable and data privacy-enhanced to minimize emergent properties or unintended	5	
A.7.2	Data for development and enhancement of AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Quality Operations	DCH-22	Mechanisms exist to check for Redundant, Obsolete/Outdated, Toxic or Trivial (ROTT) data to ensure the accuracy, relevance, timeliness, impact, completeness and de-identification of information throughout the information lifecycle.	5	
A.7.2	Data for development and enhancement of AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.7.3	Acquisition of data	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Source Identification	AAT-12.1	Mechanisms exist to identify and document data sources utilized in the training and/or operation of Artificial Intelligence and Autonomous Technologies (AAT).	5	
A.7.3	Acquisition of data	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Data Quality Operations	DCH-22	Mechanisms exist to check for Redundant, Obsolete/Outdated, Toxic or Trivial (ROTT) data to ensure the accuracy, relevance, timeliness, impact, completeness and de-identification of information throughout the information lifecycle.	5

A.9	Use of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.9	Use of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting	5	
A.9.2	Processes for responsible use of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.9.2	Processes for responsible use of AI systems	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting business functions, workforce, and/or customers based on industry-recognized standards to achieve the specific goals of the process area.	5	
A.9.3	Objectives for responsible use of AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting	5	
A.9.3	Objectives for responsible use of AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.9.4	Intended use of the AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Service Delivery (Business Process Support)	OPS-03	Mechanisms exist to define supporting business processes and implement appropriate governance and service management to ensure appropriate planning, delivery and support of the organization's technology capabilities supporting business functions, workforce, and/or customers based on industry-recognized standards to achieve the specific goals of the process area.	5	
A.9.4	Intended use of the AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI TEVV Post-Deployment Monitoring	AAT-10.13	Mechanisms exist to proactively and continuously monitor deployed Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.9.4	Intended use of the AI system	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.10	Third-party and customer relationships	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM)	TPM-03	Mechanisms exist to: (1) Evaluate security risks and threats associated with Technology Assets, Applications and/or Services (TAAS) supply chains; and	5	
A.10	Third-party and customer relationships	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM) Plan	RSK-09	Mechanisms exist to develop a plan for Supply Chain Risk Management (SCRM) associated with the development, acquisition, maintenance and disposal of Technology Assets, Applications and/or Services (TAAS), including documenting	5	
A.10	Third-party and customer relationships	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Services	TPM-04	Mechanisms exist to mitigate the risks associated with third-party access to the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	

FDE #	FDE Name	Focal Document Element (FDE) Description	STRM Rationale	STRM Relationship	SCF Control	SCF #	Secure Controls Framework (SCF) Control Description	Strength of Relationship	Notes
A.10	Third-party and customer relationships	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Third-Party Management	TPM-01	Mechanisms exist to facilitate the implementation of third-party management controls.	10	
A.10	Third-party and customer relationships	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for security, compliance and resilience controls between internal stakeholders and External Service Providers (ESPs).	5	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM) Plan	RSK-09	Mechanisms exist to develop a plan for Supply Chain Risk Management (SCRM) associated with the development, acquisition, maintenance and disposal of Technology Assets, Applications and/or Services (TAAS), including documenting selected mitigating actions and monitoring performance against those plans.	5	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Contract Requirements	TPM-05	Mechanisms exist to require contractual requirements for applicable security, compliance and resilience requirements with third-parties, reflecting the organization's needs to protect its Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Third-Party Management	TPM-01	Mechanisms exist to facilitate the implementation of third-party management controls.	10	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM)	TPM-03	Mechanisms exist to: (1) Evaluate security risks and threats associated with Technology Assets, Applications and/or Services (TAAS) supply chains; and (2) Take appropriate remediation actions to minimize the organization's exposure to those risks.	5	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for security, compliance and resilience controls between internal stakeholders and External Service Providers (ESPs).	5	
A.10.2	Allocating responsibilities	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Services	TPM-04	Mechanisms exist to mitigate the risks associated with third-party access to the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Subset Of	Third-Party Management	TPM-01	Mechanisms exist to facilitate the implementation of third-party management controls.	10	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM)	TPM-03	Mechanisms exist to: (1) Evaluate security risks and threats associated with Technology Assets, Applications and/or Services (TAAS) supply chains; and (2) Take appropriate remediation actions to minimize the organization's exposure to those risks.	5	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Contract Requirements	TPM-05	Mechanisms exist to require contractual requirements for applicable security, compliance and resilience requirements with third-parties, reflecting the organization's needs to protect its Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for security, compliance and resilience controls between internal stakeholders and External Service Providers (ESPs).	5	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Third-Party Services	TPM-04	Mechanisms exist to mitigate the risks associated with third-party access to the organization's Technology Assets, Applications, Services and/or Data (TAASD).	5	
A.10.3	Suppliers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Supply Chain Risk Management (SCRM) Plan	RSK-09	Mechanisms exist to develop a plan for Supply Chain Risk Management (SCRM) associated with the development, acquisition, maintenance and disposal of Technology Assets, Applications and/or Services (TAAS), including documenting selected mitigating actions and monitoring performance against those plans.	5	
A.10.4	Customers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Context Definition	AAT-03	Mechanisms exist to establish and document the context surrounding Artificial Intelligence (AI) and Autonomous Technologies (AAT), including: (1) Intended purposes; (2) Expected benefits and costs.	5	
A.10.4	Customers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies-Related Legal Requirements Definition	AAT-01.1	Mechanisms exist to identify, understand, document and manage applicable statutory and regulatory requirements for Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.10.4	Customers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	AI & Autonomous Technologies Business Case	AAT-04	Mechanisms exist to benchmark capabilities, targeted usage, goals and expected benefits and costs of Artificial Intelligence (AI) and Autonomous Technologies (AAT).	5	
A.10.4	Customers	For specific requirement details, buy a licensed copy of the Focal Document at: https://www.iso.org/standard/81230.html	Functional	Intersects With	Responsible, Accountable, Supportive, Consulted & Informed (RASCI) Matrix	TPM-05.4	Mechanisms exist to document and maintain a Responsible, Accountable, Supportive, Consulted & Informed (RASCI) matrix, or similar documentation, to delineate assignment for security, compliance and resilience controls between internal stakeholders and External Service Providers (ESPs).	5
